ABSTRACT OF THE DISCLOSURE

25 This invention provides neophyte or experienced nail technicians and nail artists a variety of sizes and shapes simulated fingernails for practice in nail enhancements and hand-painted nail art or airbrushing nail art. The device simulates the human finger in size, shape and weight, and may be reused after the enhancements are removed. In addition, the device will be used to display a variety of nail enhancements, colors of nail polishes, and nail art designs for review by prospective customers of such nail enhancements.
